

MarClean Green

- Neutral High Concentrate Tank Cleaner

Description

MarClean Green is an effective and economical cleaning agent for removal of lube oils, gasoil, hydrocarbon products/chemicals, vegetable oils, phthalates, paraffines and odour intensive chemicals. MarClean Green is a neutral high cleaning concentrate, that is free of solvents, no dangerous and good in regulation of transport (land, sea and air).

MarClean Green contains biodegradable surface active agents, complexing agents and additives (biodegradable > 90 %).

- Suitable in freshwater and seawater.
- Suitable for re-circulation cleaning and injection into the butterworth system.
- The optimal cleaning temperature is from 10-60°C.
- Approved by IMO.
- Approved by major coating manufacturers.

Directions for Use

Tank Cleaning: MarClean Green can be used in re-circulation- or in direct injection methods. MarClean Green is highly concentrated. With manual cleaning, MarClean Green can be diluted up to 30 parts of water, depending on the degree of contamination.

It is recommended to pre-wash the tank with hot water at about 40°C to 60°C before applying MarClean Green. Then transfer a 0.2–0.4% concentration solution of MarClean Green into the required tank for cleaning. Allow circulation through a pumping system for a period of 2-5 hours.

MarClean Green is applied to the pre-wash system by spraying the tank surfaces thoroughly. Allow the solution to penetrate and react for about 30 minutes. Then rinse all tank surfaces thoroughly with hot water at about 60°C. The dosage required for spray method is approximately 4 litres of MarClean Green to 1000 litres of washing water.
